

Panoramic Power™ Gen 4+ Bridge

Overview and technical specifications

Energy insights from Centrica Business Solutions provide organisations with unparalleled visibility into their entire energy estate by delivering a wide range of granular and actionable energy intelligence in real-time. Our energy insights solutions consist of Panoramic Power wireless sensors that are easily attached to circuits. The sensors – in combination with integrated 3rd party meters for gas, heat, air and water – transmit data to our Panoramic Power Gen 4+ Bridge. The Gen 4+ Bridge makes this collected energy intelligence available for visualisation and analysis in PowerRadar™, our cloud-based energy management platform. Customers retain the flexibility to use the software of their choice by using the Modbus TCP interface to export and manage the data locally – directly from the Gen 4+ Bridge. A selection of hardware is available to meet organisational requirements.
